Recommendations

1. Find out region,store and product-wise appropriate reasons for target gap or shortfall like Product defects, dynamic customer preferences, competitor discount, high pricing, stockout, seasonal demand change, insufficient advertising and poor customer service.

2. Prioritize critical underperforming stores and find out their products having high shortfall. Find out why they are lagging and take suitable corrective actions.

3. Electronics category having the highest sales shortfall and Home & Kitchen category having lowest target achievement. Investigate their weakest products and stores and develop recovery Strategy.

4. Northeast region has the lowest target achievement. Check supply chain, product availability, seasonality and customer preference and make strategy for improvement.

5. East region has the highest sales shortfall because of maximum sales. Maintain sell performance as well as reduce sales shortfall by investigating valid reasons.

6. Create store/category specific action plans rather than the same strategy across all stores and products.

7. Introduce weekly sales performance monitoring and appropriate recovery action plans.

8. Learn the strategy from high performing stores and implement those strategy to low performing stores.

9. Avoid excessive discounting to achieve sell target. Try to achieve sell target by protecting gross profit during recovery.

10. Establish accountability for recovery by assigning responsible managers and corrective actions to priority stores and categories.

11. Validate missing targets and sales records before making final management decisions.
